HighlightsNovember 1965

Producer Deliveries. A total of 145,836 producers, 10,855 fewer than in November 1964, delivered 3.9 billion pounds of milk to regulated handlers in 68 comparable markets during November 1965. This represents a decrease of 2.6 percent from producer deliveries during November 1964. Average daily delivery per producer increased from 862 pounds in November 1964 to 902 pounds in November of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown in table 3.

Producer Deliveries Used in Class I. The volume of producer deliveries sold for fluid (Class I) use in the 68 markets increased 5.1 percent from last year to a total of 2.8 billion pounds for the month of November 1965. The reason for this increase may have been the four Sundays occurring in November this year, as compared to the five last year. Very little milk is sold on Sundays. The average utilization percentage for November was 71 percent, up from 66 percent last year. Fifty-one markets showed an increase in the Class I utilization percentage, three showed no change, and the remaining fourteen markets showed a decrease (see table 4).

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-and-out of defined marketing areas, increased 5.3 percent in the 68 markets for the month of November.

Minimum Prices. The weighted average Class I price paid by handlers in the 68 markets for 3.5 percent milk was \$5.19 per hundredweight, three cents higher than the \$5.16 per hundredweight price in November 1964. Minimum Class I prices in November were higher in 44 markets, unchanged in three markets, and lower in the remaining 21 markets.

Producers in the 68 markets received a weighted average blend price of \$4.70 per hundredweight for 3.5 percent milk. This is 13 cents higher than the November 1964 blend price of \$4.57. Producers received higher blend prices in 50 markets, the same price in three markets, and a lower price in the remaining 15 markets. Class prices, blend prices, and associated butterfat differentials, by markets, are reported in table 1.

Whole Milk Sales. Total in-area whole milk sales for November 1965 in 68 marketing areas are estimated at about 1.9 billion pounds, 4.9 percent above such sales in November of last year. Complete October in-area sales for total fluid milk items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported in table 6.

YEAR TO DATE

Minimum Prices. The weighted average Class I price for the January-November period for the 68 markets was \$4.91, six cents higher than the \$4.85 price in 1964. The 1965 weighted average blend price was \$4.27, seven cents higher than the blend price of \$4.20 reported for this period in 1964 (see table 2).

Producer Deliveries and Deliveries Used in Class I. Total milk deliveries and deliveries used in Class I are reported for individual markets in table 5. In the first eleven months of this year, compared to the same period in 1964, producer deliveries for the 68 markets were up 0.3 percent, and deliveries used in Class I were up 1.7 percent. Data for the 68 markets and for all markets are summarized below:

1/ Volumes include 29-day totals for February 1964. The percentage changes are based on adjusted 28-day totals for February 1964 to make them comparable with 1965.

2/ Markets under regulation on January 1, 1964, and which have had no significant marketing area expansions. Excludes Columbus, Louisville-Lexington-Evansville, Paducah, Nashville, Mississippi, and Red River Valley.

3/ Class I plus Class II = 5,671,152 thousand pounds in 1965 and 5,693,988 thousand pounds in 1964; utilization = 52 percent in 1965 and 53 percent in 1964.

4/ Fluid cream included in Class I, effective April 1, 1965. Class I plus fluid cream = 2,239,823 thousand pounds in 1965, utilization 43 percent (including fluid cream, January-March, 22,512 thousand pounds); Class I plus fluid cream = 2,248,842 thousand pounds in 1964, utilization 41 percent (includes fluid cream January-November, 84,975 thousand pounds.)

5/ Data for 1965 are totals of the January-April data for the former Mississippi Delta market and May-November for the Mississippi market. Data for 1964 are totals of the combined January-August totals for the former Mississippi Delta, Central Mississippi, and Mississippi Gulf Coast markets and the September-November data for the Mississippi Delta market.
